

Hazara Technical Services LLC

Incorporated in 2007, in Dubai, United Arab Emirates, Hazara Technical Services is a major part of the technical and electro-mechanical industries of the region. Under the careful nurturing and guidance of the Managing Director – Adnan Mughal – Hazara has grown into a strong family of dedicated workers with a robust work ethic and unparalleled commitment to the contracts we take under our wing. Some of the major services that the company provides are HVAC, electric works, plumbing, CCTV and networking, tiling, painting, insulation, carpentry, and cladding. These services have been key in some of the most iconic engineering projects across the UAE.

Infrastructural expansion is a marker of development in any society, and a measuring range of advancement of any particular township. With cities like Dubai being world renowned for their wealth, dynamic growth, and booming construction scale, one has to wonder what contributes to such efficiently established engineering treasures. There is intense work that goes into quick (but reliable) architectural and engineering work, with multitudes of industries and technicalities coming together.

At Hazara Technical Services, we believe in providing this helping hand that will launch your dream project into the world of sophistication with efficiency and rigour. With a combination of a hands-on ground team fully qualified in installation, commission, and operation – and a dynamic off-shore team providing all round solutions to a complimentary host of technologies – Hazara brings to you the complete package of technique, precision, and maintenance.

Our Team			
Engineers	4	Firewatchers	5
Supervisors	14	First aid	6
Technicians	100		
Helpers	90		
Scaffolders	30		

We work towards achieving our goals with the highest standards for quality, safety, and environmental responsibility. There is no compromise on the products we deliver. Hazara is a company of 210 strong, with 4 engineers, 14 supervisors, 5 fire-watchers, 6 fast aid responders, 30 scaffolders, 90 helpers, and a whopping 100 technicians. Like a harmonious group of worker bees, Hazara's teamwork is methodical and prompt. This diverse team of talented and well trained individuals come together to make our family what it is – a group that values your time, commitment, and the promise we make to you when we undertake any project.

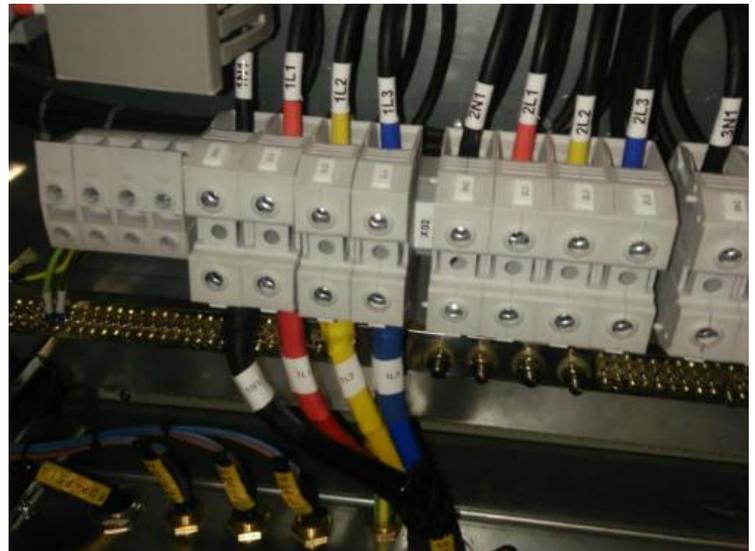

We may be based out of Dubai, but our reach is far and wide. With distinguished clients across the Middle Eastern region, Hazara has found itself working closely with companies and contracts that allow it to grow exponentially, and build a reputation for high parameters of quality and exceptional service.

Although it is easy to make verbal and written promises, we let our work speak for itself. Over the last decade, Hazara has had the great fortune and privilege to work with some of the largest names in construction in the Middle East. Our portfolio of work includes, but is not limited to, names like Midong Engineering & Construction Co. Ltd., Concord Corporation Ltd., Sendan Al Emarat Co. Ltd., Trojan Construction Co. Ltd., and United Engineering Ltd. These esteemed corporations trusted our skills as service providers, and our work shows just how well placed that trust was.

No	Main Contractor	Projects
1	Midong Engineering & Construction Co Ltd	<p>A. Project: Dubai Metro, 2008</p> <ul style="list-style-type: none"> • Metro (Red line) TPS cable tray installation • LV Switch gear panel installation • Smdb panel installation TPS and track side LV • 33KV cable pulling <p>B. Project: Khalifa Port, Abu Dhabi, 2010</p> <ul style="list-style-type: none"> • LV switch gear installation • 33kv cable pulling • Power cable and control cable pulling • Cable tray installation.

2	Concord Corporation Ltd	<p>A. Project: Dubai Metro, Rashidiya Depot, Dubai 2018</p> <ul style="list-style-type: none"> • Power cable (300mm) pulling and cable termination • TPS and LV Switch gear panel installation <p>B. Project: Expo 2020, Dubai</p> <ul style="list-style-type: none"> • R70,R71,R72,R38 cable tray installation
3	Trojan Construction Co Ltd	<p>Project: Arabian Rechines</p> <ul style="list-style-type: none"> • Cable pulling and cable termination • CCTV cable pulling and CCTV camera installation
4	United Engineering Ltd	<p>Project: CCTV camera installation</p>

Among some of our most illustrious contracts is the work we have done with Midong Engineering & Construction Co. Ltd. With two projects for them under our belt (the Dubai Metro project in 2008 and Khalifa Port in Abu Dhabi in 2010), our team oversaw work such as LV switch gear panel installation, 33KV cable pulling, power cable and control cable pulling, cable tray installation, SMDB panel installation, TPS and Track Side LV, and TPS cable tray installation for the Metro Red Line.

We have done similar work with corporations like Concord Corporation Ltd, with whom we have been working since 2018. Our work with them includes 33KV cable pulling, cable tray installation, and traction cable termination. We specifically do 300mm power cable pulling and cable termination, and TPS and LV switch gear panel installation, for their Dubai Metro

Project at Rashidiya Depot. We have also done R70, R71, R72, and R38 cable tray installation for their Expo 2020 Dubai Project.

Meanwhile Trojan Construction Corporation Ltd. has utilised our services not only for cable pulling and cable termination (for their Arabian Reches Project) but also CCTV Installation. We have also done CCTV Camera Installation for United Engineering Ltd.

Hazara not only prides itself on providing all these technical work and maintenance for large scale projects, but also undertakes a variety of services for specialised industrial development work (such as cladding, plumbing, electrical, HVAC, and carpentry). With the combination of our incredible staff and our global partners, we bring to you the technical expertise that you have been searching for.

The beauty of construction work lies in its fortitude. Any well executed construction work exhibits the qualities of resilience, timelessness, and elegant allure. All this is only possible when there is a cohesive group of professionals working together to make sure all the cogs in the machine are well oiled and working perfectly for many years to come. At Hazara, we believe in this philosophy of functioning in harmony to create marvels that withstand the test of time for future eras.
